

Leaf Wreath

Make a wreath of colored leaf cutouts and nature finds.

You will need:

A variety of colors of construction paper
Glue
Scissors
Raffia
Small pine cones and acorns
8" or 9" paper plates

To do:

Cut out the center of the paper plates. Enlarge and trace the leaf patterns provided here on the construction paper. Cut out the leaves and glue them to the edges of the paper plate. Overlap the leaves so that the white of the plate does not show.

Add a few pinecones or acorns to the top of the leaves and a raffia bow. For best results dry over night and then add a piece of raffia for hanging the wreath of leaves.
