

Activities

Recycling Discussion

Talk about the environment and how important it is to take care of our earth. Brainstorm with the children about the kinds of things we can do at home and school. How can we conserve water and resources? What is recycling? Are there things we are not recycling now that we could start recycling?

School/Community Recycling

Check with the rest of your staff and see if there are ways to recycle more or save resources in your building. Implement these ideas with the children.

Picking up Trash

Plan a nature walk and give everyone a brown grocery bag to put trash in. If possible go around the block or a little farther out in the community to pick up trash.

Recycle Art

Use recycled items to make sculptures or other projects.
